

Make a Mini log cabin replica

Younger students - with milk carton, icing and pretzels

Older Students - Shoe box, glue and Popsicle sticks

Cut a small square in the front of the box, cover with icing or glue and then place the “logs” pretzels or Popsicle sticks, vertically on the door and horizontally on the box. They can also cut out a window if they like – but only one!

Lincoln Logs were named after President Lincoln - Ask any of your students if they have Lincoln Logs that they could bring in to your class and let the children build with them for the week that you are studying Lincoln.
