

## GRADE SCHOOL PUPILS INSPECT AIRPLANE

Pupils of the second grade at the South Side school, Champaign, were taken to the Champaign airport Friday by their teacher, Miss Aldene Chesebro, to learn about aircraft and flying by inspecting a

plane and hearing an explanation by Jack Roberts, a brother of one of the pupils. Above, Roberts is explaining the motor and propellor to Jack Bigger, Gertrude Day, Joyce Arnold, and Norton Compton.

In the picture above, controls of the plane are being explained by Roberts to his brother, Stewart Roberts, while other pupils look on from points of vantage in the cockpit of the plane. The inspection

is a part of textbook study in the school system, by which tours of inspection aid pupils in understanding subjects they study.
