2.	2.	2.
3.	3.	3.
4.	4.	4.
5.	5.	5.
6.	6.	6.
7.	7.	7.
8.	8.	8.
9.	9.	9.
10.	10.	10.
11.	11.	11.
12.	12.	12.
13.	13.	13.

Determining the Number of U.S. Representatives Worksheet

Northern States Plan	Southern States Plan	3/5ths Compromise
Total Pop. – Slave Pop. = **Non-Slave Pop.** 30,000 Do not round. Use the whole number.	**Total Pop.** 30,000 Do not round. Use the whole number.	1. Total Pop. – Slave Pop. = Non-Slave Pop. 2. **(Non-Slave Pop. + (3/5)(Slave Pop.))** 30,000

Use the rankings of states to answer the questions below.

1. According to the plan proposed by the northern states, which states would have the most representatives (power) in the House of Representatives? (list the top five states)

2. According to the plan proposed by the southern states, which states would have the most representatives (power) in the House of Representatives? (list the top five states)

3. According to the Three-Fifths Compromise, which states would have the most representatives (power) in the House of Representatives? (list the top five states)

4. Comparing the rankings of the states according southern and northern plans, are there any states that significantly lose or gain power in the House of Representatives? (Write in complete sentences and be specific.)

5. Do you think the Three-Fifths Compromise is a fair solution to the slave representation issue between the northern and southern states? Why of why not? Use the rankings above to support your answer with specific details.
