

Introduction

This statistical overview provides the Redistricting Committee with data related to potential attendance area boundary changes. Urbana School District (USD) provided the Champaign County Regional Planning Commission (RPC) with student information from the current enrollment (2011-2012). This included home address, race, and program enrollment. Addresses were located on a map with 99.6% success. Statistical summaries were then generated for the attendance areas based on students residing in the Attendance Area (A.A.) and for each school.

Boundary Adjustment Impacts

School enrollment at USD can be categorized to show the impact of adjusting attendance area boundaries. Several USD programs and policies require or allow students to attend a school outside of their “home” attendance area. This portion of the student population will not be affected by boundary changes since their enrollment is not dependent on the location of their residence. The “Other” category classifies students that do not attend school in their attendance area and are not identified as LEP, Petitioner, or School Choice. Table 1 enumerates these various categories. The shaded column represents the students that will be used to assess potential boundary adjustments since they will be impacted by any potential boundary adjustments.

Table 1: Enrollment Categories

	Capacity	Current enrollment	Enrollment from within “home” A.A.	Enrollment from other Attendance Areas					
				Total	LEP ¹	Petition	School Choice	Petition and Choice	Other
King	404	354	222	132	52	2	28	0	50
Leal	459	439	344	95	75	2	0	0	18
Prairie	378	302	261	41	N/A	13	0	0	28
Thomas Paine	326	269	201	68	N/A	5	45	1	17
Wiley	348	334	301	33	N/A	16	2	0	15
Yankee Ridge	348	320	299	21	N/A	14	0	0	7
Total	2,263	2,018	1,628	390	127	52	75	1	135

Target Attendance Area Statistics

In order to assess boundary adjustments, target enrollments should be identified. Average capacity is one method of identifying appropriate balance for each school. The entire district is at 89.2% of capacity based on available information. Table 2 identifies the capacity of each school and identifies potential changes that balance the enrolled population between schools. Changes to school petition policies or other school choice considerations could impact the level of change needed to achieve balance. Table 3 refines the potential changes based on expected growth in the community that will affect the school population. This information is based on materials presented by the City of Urbana, but can be altered by the committee. The shaded column shows potential redistricting targets for consideration by the committee.

Table 2: Identifying Population Targets

	Capacity	Current enrollment	Percent of capacity	Changes to achieve Enrollment balance at 89.2% capacity
King	404	354	87.6%	+6
Leal	459	439	95.6%	-30
Prairie	378	302	79.9%	+35
Thomas Paine	326	269	82.5%	+22
Wiley	348	334	96.0%	-24
Yankee Ridge	348	320	92.0%	-10
Total	2,263	2,018	89.2%	N/A

Socioeconomic Overview

Urbana School District is divided into six attendance areas. These attendance areas are the primary method used to determine the school a student will attend. Exceptions are made for various reasons (language programs, school choice, etc.), but Attendance Areas determine where approximately 80% of the student population will attend school within the Urbana School District. Table 4 summarizes the projected enrollment for the district as identified in the Demographic Study. This shows declining enrollment throughout the district through 2014. Tables 5 and 6 provide the racial composition of attendance areas and schools.

Table 4: Projected Enrollment

Attendance Area	Current enrollment		2014 projected enrollment	2019 projected enrollment
	2009	2011-2012		
King	299	354	326	324
Leal	405	439	385	370
Prairie	321	302	306	300
Thomas Paine	264	269	266	259
Wiley	288	334	316	295
Yankee Ridge	316	320	354	333

According to the 2010 American Community Survey, the Median Family Income for the City of Urbana is \$55,522. Median Family Income by attendance area was calculated by a weighted average of median family income for each Census Block Group located in the attendance area. Incomes are weighted by the number of families within the block group. Median Family Income by school was calculated by allocating median income statistics to student families based on where they live. The average income is determined for all families attending the same school. King School shows a higher school average median income because a large number of students attending the school live outside of the attendance area and in areas with higher median family incomes.

Table 7: Median Family Income and Free and Reduced Lunch

	Attendance Area Weighted Median Family Income	School Average Median Family Income	Free and Reduced Lunch	% Free and Reduced Lunch
King	\$25,397	\$38,716	318	89.3%
Leal	\$71,625	\$68,193	268	60.9%
Prairie	\$53,151	\$55,041	247	81.5%
Thomas Paine	\$61,520	\$60,625	167	61.6%
Wiley	\$44,769	\$47,546	231	69.0%
Yankee Ridge	\$66,642	\$71,779	159	49.4%
Average	N/A	N/A	N/A	68.3%
